Computer Science graduate pursuing a Master of Engineering Management (MEM) at the University of Colorado Boulder with experience analyzing operational data, conducting root cause analysis, translating business requirements, and developing data-driven solutions. Skilled in SQL, Python, Excel, Power BI, and Tableau, with experience communicating analytical findings to Product and Operations stakeholders. Seeking Business Analyst, Product Analyst, and Operations Analyst internships for Summer 2027.

PROFESSIONAL EXPERIENCE

AI Proposal Intern | Techolution Consulting LLC Hyderabad, IN

Aug 2025 – November 2025

- Contributed to the end-to-end development of enterprise proposals and SOWs, translating client requirements into structured technical solutions across Government, Healthcare, Retail, and Manufacturing engagements.
- Developed HVPDs, solution decks, and SOWs defining problem statements, solution architecture, KPIs, and milestones; collaborated with Sales, Product, and Delivery teams to align technical solutions with business requirements.
- Standardized proposal workflows and documentation by developing reusable templates, checklists, and tracking systems, reducing back-and-forth and improving review efficiency and consistency across presales engagements.
- Translated AI and Cloud capabilities into business-aligned solution narratives, collaborating with engineering teams to validate technical assumptions, assess delivery feasibility, and define implementation requirements.

Research Assistant Intern | Faff Technologies, Bengaluru, IN

May – Aug 2025

- Managed 25+ high-priority client issues weekly alongside Relationship Managers, improving SLA adherence through structured prioritization, escalation, and resolution workflows.
- Conducted root cause analyses on recurring client issues using operational dashboards and ticket data, reducing resolution TAT by 30% and minimizing escalation loops.
- Authored 10+ RCA reports and insight decks to support Product and Operations decision-making, identifying systemic inefficiencies and recommending scalable workflow improvements.

Head, Organizing Committee | Student Council, KMIT Hyderabad, IN

Apr 2024 – Oct 2025

- Led an 8-member team to plan and execute 10+ campus events for 1,500+ attendees, coordinating logistics, vendor negotiations, timelines, and on-ground execution with a 100% delivery rate.
- Implemented data-informed process improvements that increased student engagement by 25% and reduced coordination overhead for future events.

EDUCATION

University Of Colorado, Boulder

Aug 2026 – May 2028

Master of Engineering Management (MEM)

Keshav Memorial Institute of Technology, Hyderabad

Sep 2022 – May 2026

B.Tech in Computer Science Engineering | GPA: 8.21/10

PROJECTS

Supply Chain Analytics & Inventory Optimization | SQL, Python, Excel, Power BI

- Analyze historical demand, inventory levels, lead times, and order data using SQL and Python to identify stockout, overstock, and demand-pattern trends.
- Build an interactive Power BI dashboard tracking inventory turnover, stockout rate, fill rate, lead time, demand variability, and supplier performance.
- Develop inventory and replenishment recommendations using demand patterns, lead-time variability, safety-stock concepts, and service-level targets.

JanSampark: Community Engagement Platform | Flutter, MongoDB

- Independently conceptualized, designed, and developed a full-stack mobile app to improve community communication; built complete user flow, real-time data integration, and cross-platform UI, using Flutter and MongoDB; awarded **Best Project at EXPO 2024** for innovative concept and technical execution.
- Defined product requirements, user flows, and functional specifications for a community engagement platform, translating user needs into prioritized product features.
- Created user stories, acceptance criteria, and a product roadmap; prioritized features based on user impact, technical feasibility, and implementation effort.

E-Commerce Product Analytics & Feature Optimization | SQL, Python, Excel, Power BI

- Analyzed customer and product transaction data using SQL and Python to identify engagement, conversion, retention, and feature-usage patterns.
- Built an interactive Power BI dashboard tracking DAU/MAU, conversion rate, retention, feature adoption, and customer-segment performance to evaluate product health.
- Segmented users by behavioral patterns and translated findings into data-driven feature prioritization recommendations based on user impact and implementation feasibility.

SKILLS

Technical & Data: Python, SQL, Java, C, Excel, Power BI, Tableau, MongoDB

Product Analytics: Product Metrics, Funnel Analysis, Customer Segmentation, Retention Analysis, Feature Adoption , Data Analysis, Statistical Analysis s

Supply Chain & Operations: Supply Chain Analytics, Inventory Analysis, Demand Analysis, Process Improvement, KPI Analysis, Operational Reporting

Business & Management: Requirements Analysis, Root Cause Analysis, Stakeholder Management, Cross-Functional Coordination, Process Mapping, Project Planning

Product Management: Product Discovery, Requirements Definition, User Stories, Acceptance Criteria, Feature Prioritization, Product Roadmapping, Product Metrics & KPIs, Business Analysis

Project & Program Management: Project Planning, Agile/Scrum, Sprint Planning, Risk Management, Dependency Management, Milestone Tracking, Cross-Functional Coordination, Stakeholder Management

Tools: Jira, Confluence, Microsoft Project, Git, GitHub,

Technical & Business: AI/Cloud Solution Development, Technical Communication, Process Improvement, Technical Writing, Proposal Development

Coursework: Operating Systems, DBMS, Computer Networks, System Design, DSA, AI/ML Fundamentals, Data Analysis, Software Development, Lean & Agile Management, Finance for Engineering Managers
